, :

Frontline incident and request management:

- Monitor the ticketing system for incoming incidents/requests
- Log and track all issues (example: phone, email, IM, walk-ups, and any other methods)
- Log and track all security-related issues (example: phishing emails)
- Troubleshoot and address issues directly; workstation issues, basic network issues (local network, Internet, Wi-Fi)
- Take ownership of tasks/projects and represent the user to ensure the requests are processed
- Communicate to the end-user on progress promptly
- Document issues, analysis, progress, solution in the ticketing system

Training To Users

- Assist with onboarding/offboarding of employees
- Provide basic in-house training of tools and applications; MS Office, Video Conferencing (ZOOM, Polycom, etc.), and collaborations suite (OneDrive, O365 groups, etc.)

Workstation Setup Management

- Setup and deployment for new employees using standard hardware, images, and software (Windows & Mac OS X)
- Modify configurations, utilities, software default settings, etc. for the local workstation

Operating System: Windows 10, Linux, Mac OS X

Active Directory: Microsoft Active Directory

Production Software: Tomcat, Jenkins

Email: Outlook

Video Conferencing: Zoom, Polycom

Office Suite: MS Office, OneDrive, Office 365

Issue and Project Tracking: Atlassian Jira

Bryce Chicoyne
Chief Operating Officer

We believe in personal growth as well as professional, and promote within when we can. Flexibility is important, too: If you have an idea, or think a process could be fixed – just raise your hand and we're all ears. The finance function in general works extremely well together. We have smart, talented, and experienced people who feed off of each other and are able to mentor new team members.

Head of G&A Department: Bryce Chicoyne - bryce.chicoyne@smartbear.com

Francisco Partners Buys SmartBear Software

PRESS RELEASE - MAY 03 2017

Francisco Partners Buys SmartBear Software

SmartBear Software, the leader in software quality tools for teams, announced today that Francisco Partners, a leading global technology-focused private equity firm, has acquired a majority stake in the company designed to support the company's accelerated growth. Terms of the transaction were not announced.

SmartBear is highly profitable and has been growing at double digit rates for more than five years. The investment by Francisco Partners will help support the company's growth which has been fueled by the demand for solutions to manage the application lifecycle and the rapidly expanding API economy. Francisco Partners has a strong track record of successfully accelerating growth in technology companies by providing M&A expertise, market guidance and capital.

With software permeating all sectors of the economy, the need for easy-to-use tools to help developers build and test new applications continues to grow. The interconnectedness of these applications through APIs is also forcing businesses of all kinds to re-think how they interact with and best serve their customers. In addition, the ever expanding combinations of applications and devices are making software quality even more complex.
